Hather Plant Hire

01709 528585
Hather Plant Hire was founded over 35 years ago. Starting with just 1 machine, the company now has over 450 in the fleet.

Our family-run plant firm caters for a vast array of projects. We have backhoe loaders, bulldozers, dumptrucks, excavators, rollers, telehandlers and many more machine types available to hire.

Based in Rotherham (Yorkshire), we are housed on an 11 acre site. We employ over 150 staff, including call handlers, fitters, wagon drivers and operators.

We offer operated and self-drive hire on all machines. Meanwhile our low loaders travel the country throughout the year to ensure your machines arrive on time.

</table>
| **Excavators**  
Ranging from 1-50 ton. These diggers are also known as Trackhoes. |
| **Dumptrucks**  
Used for transporting loose material, such as moving demolition waste and sand across site. |
| **Wheeled Excavators**  
Rubber Ducks are 360 excavators mounted on rubber tyres, mostly used for street works. |
| **Bulldozers**  
The Crawler is used to push large quantities during construction - such as sand, soil and rubble. |
| **Longreach Excavators**  
Best when being used for dredging operations. They can remove large quantities of material from underwater. |
| **Telehandlers**  
Telescopic handler have a single telescopic boom that can extend forwards and upwards. |
| **Loading Shovels**  
A front loader has a wide bucket to pick up loose material. It is very effective against gravel and sand. |
| **Rollers**  
Our small rollers are flexible with compaction control. The larger rollers are suited to heavy compaction work. |
| **Backhoe Loaders**  
This machine has a rear backhoe and shovel/bucket on the front. |
| **Site Dumpers**  
4-wheeled vehicles which carry bulk material. They have a skip in front, which can be tipped to unload. |
| **Sweepers & Tippers**  
Our road vehicle range includes grab wagons, road sweepers and tipper wagons. |
| **Crushers & Screens**  
Crushers reduce the size of material. Mechanical screening meanwhile takes ore material and separates. |
